Messiah Enterprises is an IT Support solutions company based in Chennai. Since 2019, we are providing IT Support to both small and medium-sized business to meet the evolving demands of technologies. Our teams of professionals are highly skilled IT experts who deliver the best degree of customer service to ensure that all of your requirements are met. Our highly qualified support team is proficient in networking, computer repair, data recovery and in wide range of areas. With our expertise and innovation, we provide solutions to clients' expectations and demands. We offer top-notch IT solutions for businesses, educational institutions and home offices, making us your one-stop shop for all your needs.

OUR SERVICES

We serve as the Education Service Providers for the Tamilnadu State Government, focusing on computer education, knowledge, backend learning, and preceptors' training systems. Our company has partnered with the Tamilnadu Government to establish computer labs in seminaries and sodalities and to provide IT education through qualified instructors in an effort to bridge the digital peak. Along with computer education, we also provide long-term contracts with Tamilnadu government seminaries and bodies for instructional and computer technology and smart class programs.

Our service includes

- ◆ IT SERVICES AND SUPPORT
- ◆ IT SECURITY SERVICES
- ◆ CUSTOMIZED SOFTWARE DEVELOPMENT

IT SERVICE & SUPPORT

Our IT services will offer comprehensive solutions for your company, eliminating the need to manage IT from a desk. We will address your issues proactively, monitoring your network and systems and trouble shoot problems. We provide latest updates-newest hardware or software updates when necessary to maintain your company operating efficiently.

ON-SITE AND REMOTE SUPPORT

Many companies choose on-site outsourcing providers as they consider this work risky. We take this challenge and offer customer support providing a physical location where your on-site team can work from and remote support to get your project off the ground right away for your business.

DESKTOP AND USER SUPPORT

We provide a direct technical support, a customized desktop and provide support for computer software and hardware for small and large scale business. Our helpdesk is on the cutting edge of technology, which enable us to provide a high quality service at an affordable rate.

SERVER AND NETWORK SUPPORT

We offer complete IT solutions from hardware installation and software configuration to data backup and hardware maintenance to keep your server secure. Our expert IT technicians discover, diagnose and resolve the network issues promptly keeping you connected and continuous, this makes us the leading provider in our industry.

CUSTOMIZED SOFTWARE DEVELOPMENT

We produce high quality products, applications and services through our experienced team of engineers, developers and project managers. We provide comprehensive software solutions, from conception to implementation, focusing on user needs and usability and ensuring high-quality standard, thus we are the expert in software services. Our company's experience resources are there to support your includes

- ◆ **HOSPITAL MANAGEMENT SYSTEM**
- ◆ **EDUCATIONAL MANAGEMENT INFORMATION SYSTEM(EMIS) FOR SCHOOL**
- ◆ **ERP SOFTWARE SOLUTIONS**
- ◆ **BILLING SOFTWARE SOLUTIONS**
- ◆ **COLLEGE MANAGEMENT SYSTEM**
- ◆ **OFFICE MANAGEMENT SYSTEM**

WEB AND MOBILE SOLUTIONS

We offer complete support in developing, launching and hosting web and mobile applications for different user platforms. We bring solutions that provide quick access to location-based data to the client to maximize user experience and efficiency and give them the power to work from anywhere.

WEB APPLICATIONS

We provide web applications for both corporate and personal use. They are made in a user-friendly, intuitive manner. They can also raise your company's ranking on Google search engine results pages because they are SEO-friendly. Your site traffic, lead generation, and business conversions will all rise as a result of this.

MOBILE APPS

We create iOS and Android apps that meet all of your personal and professional requirements. Our software combines all business apps with customized features and all educational needs with a tailored learning experience.

WINDOWS APPS

A better approach to promote your service or product in front of millions of customers is via Windows Applications. Windows Applications is the finest platform for product marketing, with over 500 million users globally. Your application will be featured on the Windows Store, giving you instant access to millions of new customers.

IT SECURITY SERVICES

Security breaches are becoming more and more prevalent. With more data being stored electronically, it has become an important part of business to keep all data safe and secure. We offer complete security services to ensure that your company's data is not vulnerable to theft or exploitation.

- ◆ **SERVER PROTECTION**
- ◆ **NETWORK SECURITY**
- ◆ **CCTV SECURITY**
- ◆ **BIOMETRIC AND FACE RECOGNITION ATTENDANCE SYSTEM**

SERVER PROTECTION

Choosing the right software for security can be a confusing process. Our security professionals will help you to determine the best software for your business that will keep your server site safe by using a deep learning algorithm to monitor your servers and website. We ensure the highest levels of security software that automatically detects the malware, viruses and malicious threats and keep your server protected.

NETWORK SECURITY

We will help safeguard your whole network with comprehensive suite of security solutions to help you protect your company from the latest threats. Our products include multi-factor authentication, intrusion detection, encryption and much more.

CCTV SECURITY

We offer advanced technology of modern CCTV Security cameras to keep your house, place of business and all your surroundings safe and secure. This high-resolution security camera with built-in night vision and motion capabilities will record with more clarity and gives improved security to your business and belongings.

BIOMETRIC AND FACE RECOGNITION ATTENDANCE SYSTEM

With the use of an Artificial Intelligence (AI)-based Biometric Attendance System featuring facial recognition and fingerprint biometrics attendance we provide every employee of the firm with precise time management for clocking in and out. Our system tracks the time spent at work accurately and privately and can also be used to keep track of break-times or their absence.

PROJECT DETAILS

1. E-Library Project -3 Panchayat Union Schools, Thanjavur

E-Library has opened up sources of knowledge to students who never had access to library before. It also allows them to access educational materials at their convenience, keep track of all the books, catalogs which increase their academic performances. It is specially designed for children to read interactive stories, watch cartoon, e-books, videos, audios and much more for them to enjoy their schooling. This can also be downloaded in student's device for them to enjoy and read it.

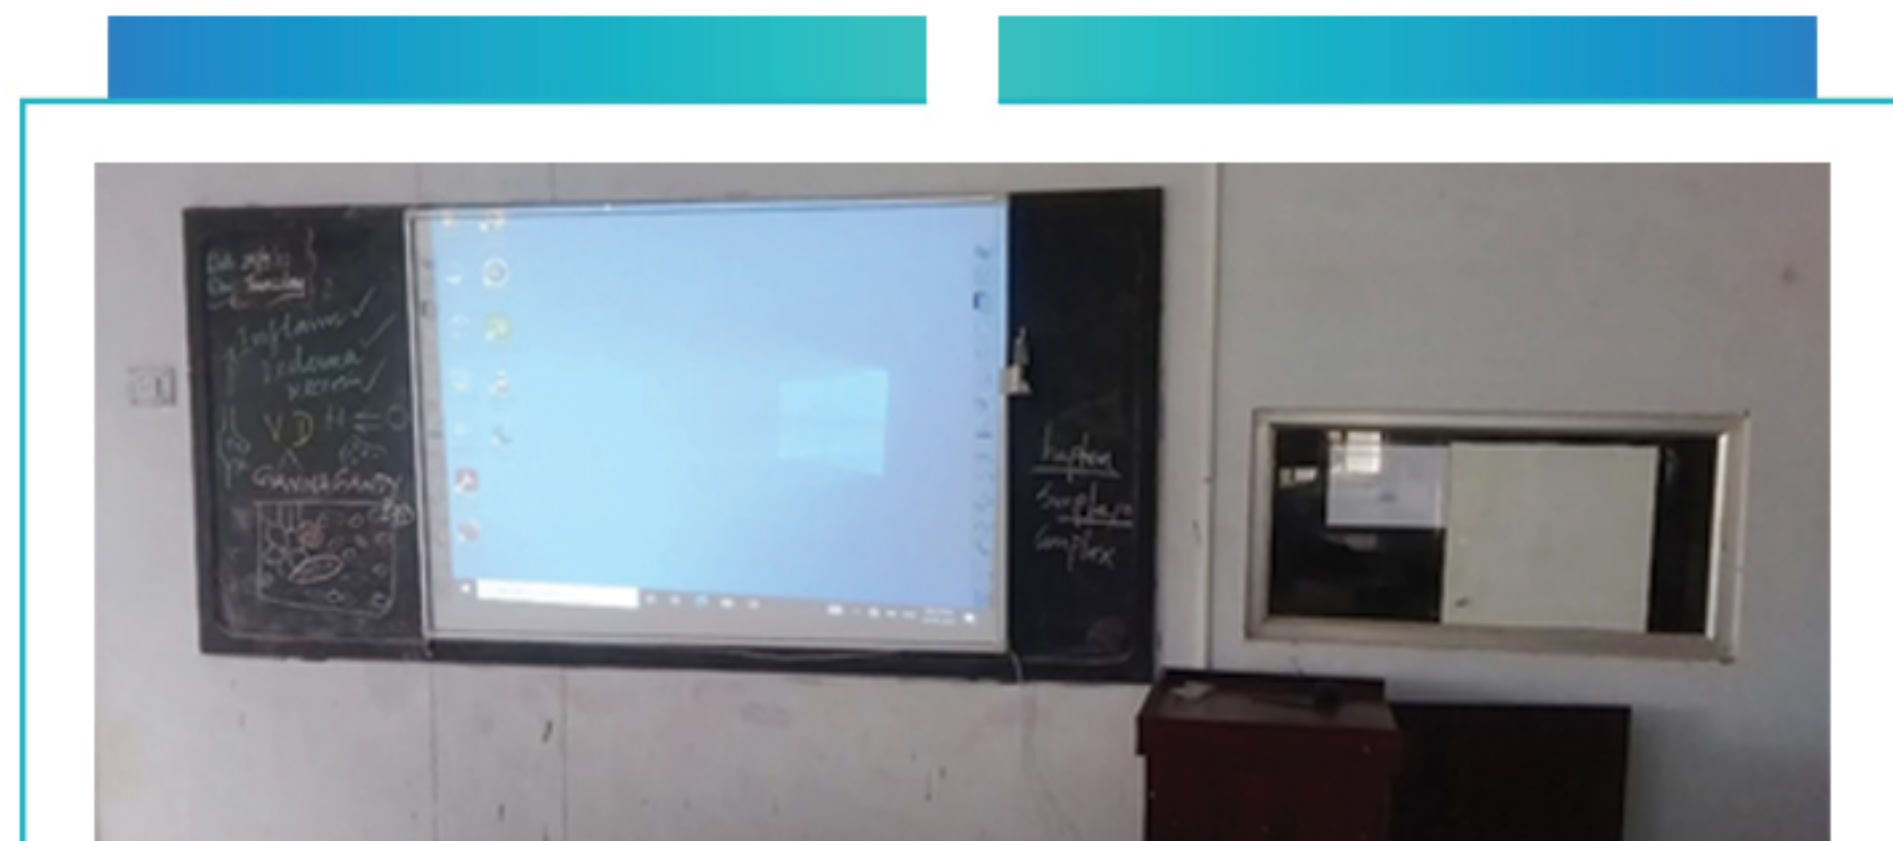

We have implemented E-Library project in 3 Government High School in Thanjavur.

2. Network Setup in office of (SAS-TN through state AYUSH Society)

Business use networks to share access to printers, files and the Internet. Office Networks are computer networks specifically designed to handle the needs of business operations. We install the necessary Network hardware and Software requirements such as routers, LAN Cable, switches, access points, OS installation and Browsers and so on. All the devices are connected to the switch using cables wired connections and Wi-Fi for wireless connections. Once, connection is established, through server file sharing and data sharing clients can share and access files.

We have implemented network sharing and configured the printer with all systems in accordance with the work order given by the State AYUSH Society, Chennai.

3. Smart Class Room Project in colleges

The increasing proliferation of new-generation information technologies, including cloud computing, the Internet of Things (IoT), and artificial intelligence (AI), has led to an increasing number of schools and institutions integrating these technologies into their curricula. It fulfills the demands of students for diversified and personalized learning while also enhancing the teaching strategies. Studying smart classrooms is crucial for creating modern smart campuses and promoting the transformation talent training.

Below are the projects that we implemented in the Tamilnadu regions,

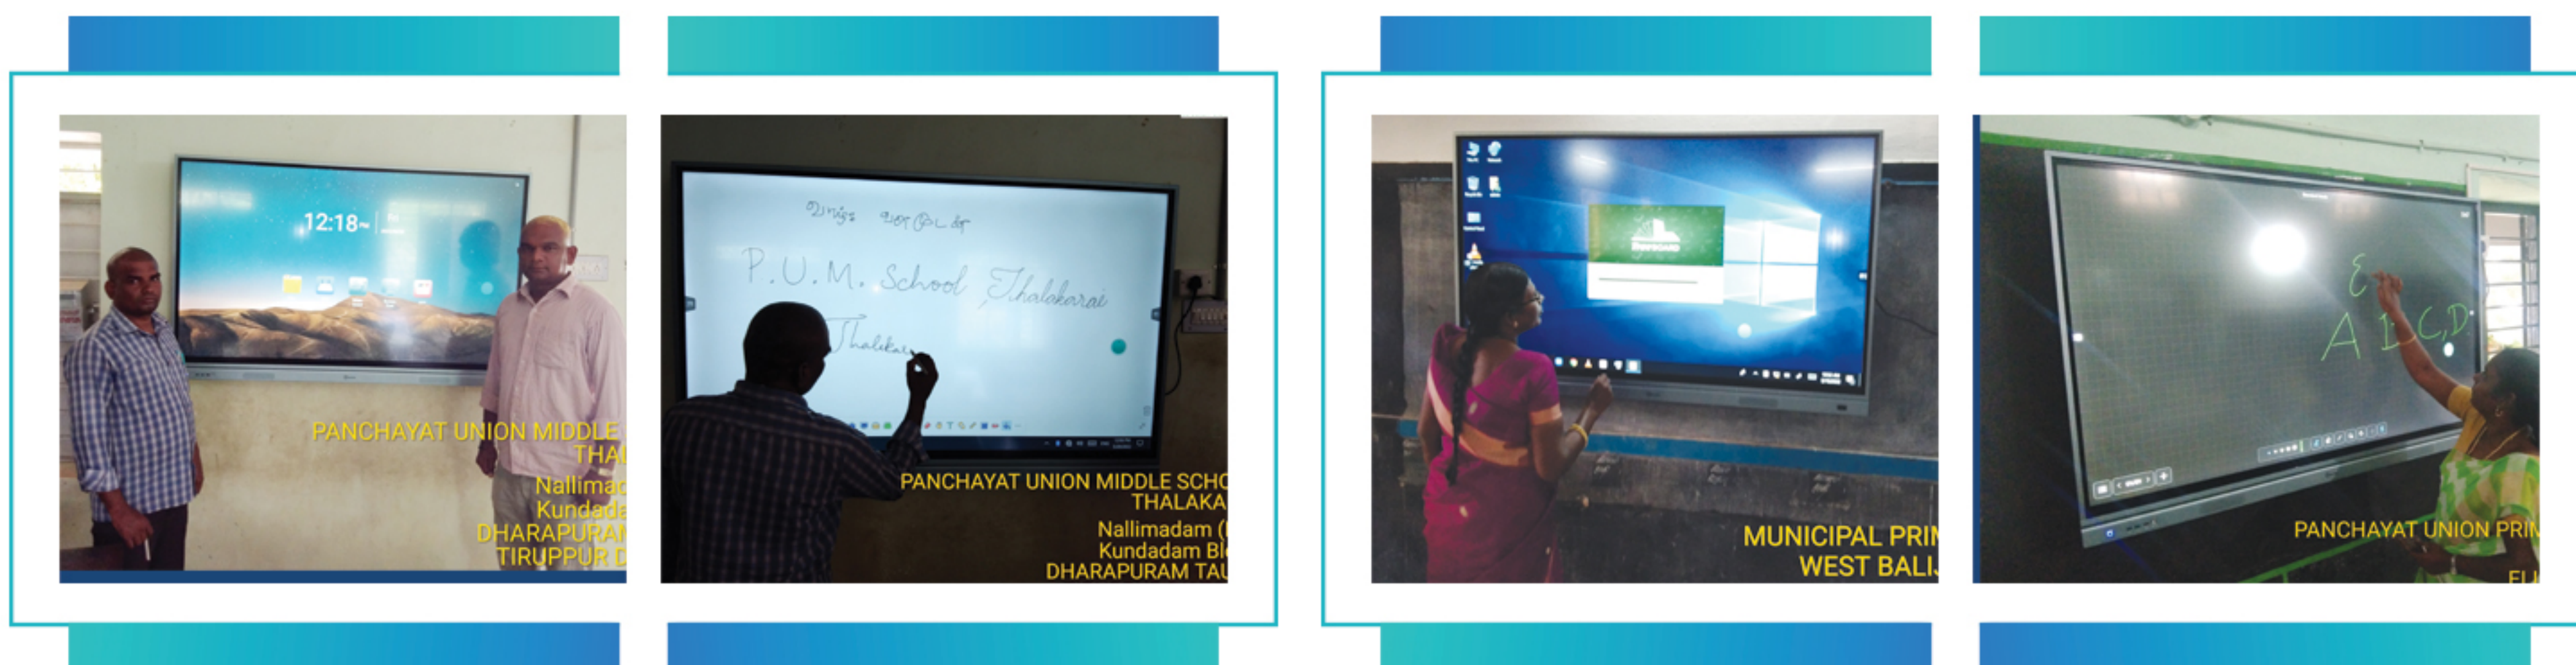

- ◆ **Arulmigu Palaniandavar College of Art and Science, Palani (2 -Smart Class Rooms)**
- ◆ **Government Ayurveda Medical College and Hospital, Thirumangalam, Madurai (4- Smart Class Rooms)**
- ◆ **Government Homeopathy Medical College and Hospital, Kottar, Nagercoil (4-Smart Class Rooms)**
- ◆ **Arulmigu Palaniandavar Polytechnic College, Palani (2- Smart Class Rooms)**

4. Smart Class Room Project in Schools

As technology is advancing so quickly, having a quality education is crucial in today's competitive environment. The Smart Classroom uses instructional material, 3D animated modules and videos to make students understand more clearly and easily. It also helps students reach their academic goals, elevate their ideas, and increase their reading comprehension, among other things.

Below are the schools in which we have successfully implemented 'Smart Class Room'

- ◆ **Dharapuram Panchayat Union Schools, Tiruppur (5-Smart Class Rooms)**
- ◆ **Kangeyam Corporation Schools, Tiruppur (11-Smart Class Rooms)**
- ◆ **Avinashi Panchayat Union Schools, Tiruppur (2-Smart Class Rooms)**
- ◆ **Vellakoil Panchayat Union Schools, Tiruppur (4-Smart Class Rooms)**

5. Smart Class Room service & IT support-

In Sacred Heart Matriculation Higher Secondary School, Chennai

Smart Class is an intelligently designed environment that leverages technology to enhance the teaching and learning experience.

In Sacred Heart Matriculation Higher Secondary School at Chennai we developed the Smart Class in working condition which already exists in nearly 30 Class Rooms. We also did services like Projector Service, projector remote, System Desktop OS update, RAM & Hard Disk Service and more.

6. AMC (Annual Maintenance Contract) service for O/o State AYUSH Society TN, Chennai

Computer systems are now a part and parcel of modern organizations. Smooth and efficient functioning of the organization nowadays depends a lot on the continuous and reliable functioning of the systems.

In SAS-TN, one year contract was taken to give complete Network, software and Hardware support for Systems, Printer & UPS

- ◆ **Using our product and services we quickly and easily resolve the issues**
- ◆ **Provide Microsoft Office Support**
- ◆ **Troubleshooting installation, renewal and setup issues**
- ◆ **Update the latest version of Operating System for best performance**

7. IT Service and Support - SEESHA, Tambaram & Vanagaram, Chennai

We offered Printer Services, Networking, and System Support for the SEESHA (Samiti for Education, Social, and Health Action) organization's office. We also updated the OS, installed new software, set up a LAN network, and replaced RAM, among many other things.

8. Tamil Nadu Innovative and Initiative

(TANII) Project for Breast Cancer Screening, Tirunelveli and Thoothukudi

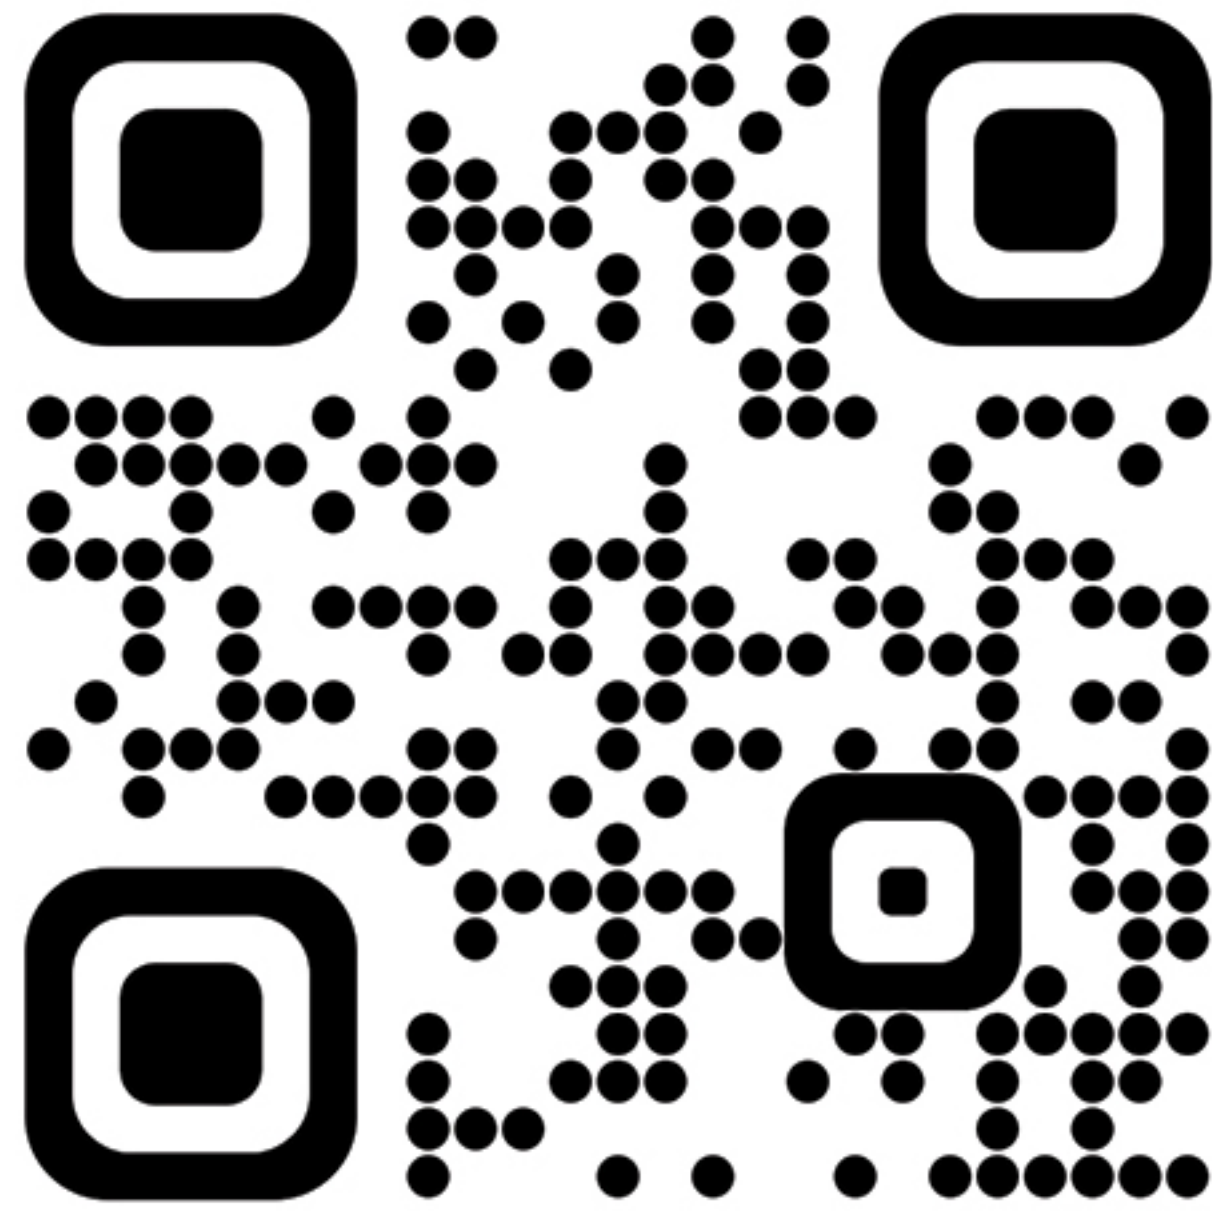

Breast cancer is the second most frequent disease worldwide and the most common malignancy among Indian women aged group between 30 -50 years. Breast cancer is more effective to treat if diagnosed early. AI integration in breast cancer screening is a promising field for early detection and improved prognosis. The Messiah Enterprises in collaboration with the research department of Dr. Agarwal's Health Care Ltd., Tirunelveli, developed AI - artificial intelligence software - for breast cancer screening in order to prevent this disease, enhance the health status of women in our community, and provide care to medically underserved women.

This software is connected to ultrasound scan equipment and used for computer-aided detection of breast cancer. The Net Beans tool classifies breast cancer images by pre-processing them with noise, predicting benign or malignant tumors. Results will be generated by the system in real time and the results will be given to the beneficiary.

This screening is done in mobile van with ultrasound breast examination facility and with trained technician. Below are the works done through our Messiah Enterprises for Breast Cancer screening project,

- ◆ WEBSITE DESIGN & DEVELOPMENT
- ◆ WEB APPLICATION DESIGN & DEVELOPMENT
- ◆ AI SOFTWARE DESIGN & DEVELOPMENT
- ◆ CLOUD SUPPORT
- ◆ AMBULANCE VAN OUTER DESIGN & STICKER WORKS
- ◆ LOGO CREATION
- ◆ SOCIAL MEDIA DESIGN WORKS
- ◆ ANIMATION VIDEO
